

The background of the slide is a photograph of an elevator interior. The walls are dark wood-paneled, and the ceiling has recessed lighting. A large, curved blue graphic element is overlaid on the top left of the image, extending towards the center.

# Aliens Lifts

Aliens Lifts is one of the established, fast-growing elevator manufacturing company, dealing with design, manufacture, erection, installation, commissioning & testing of high-quality elevators.

# Home Lifts

The Home Lift is the first lift to be uniquely designed for your home. We regard it not only as a lift but also as a piece of furniture.

The Home Lift has a well-tested and reliable screw and nut drive system developed and adapted to the requirements of a home environment – silent and smooth with a soft start and stop.

Home lift is an answer to the challenges posed by old Architecture which has not provided for access for physically challenged persons and Senior citizens.

Safety has been a key consideration throughout the entire process of developing our home lift. We want the whole family to feel completely safe. We have therefore developed the Smart Safety system, It is also possible to lock the lift, preventing children or anyone else from using it.

We have also incorporated a function that ensures the lift will run on batteries in the event of a power failure, so you are always able to lower the lift to the nearest floor and get out. The lift is equipped with a function, which prevents the batteries from discharging when the power in the house is off.

All Home Lifts have an alarm button that is connected to the operating panels, which alerts everyone around the lift that something is wrong & the lift will automatically stop operating.

# Features

WHATEVER SPACE IS AVAILABLE WE CAN INSTALL THE LIFT. NO PIT HOLE REQUIRED, NO MOTOR ROOM REQUIRED. COMPLETE FREE STRUCTURE WITH NARROW SPACING
